MANUSCRIPT			
CHAPTER	PAGE NO.	RECOMMENDATIONS, SUGGESTIONS AND COMMENT (RSC)	ACTION TAKEN (Include page number of revision made)
ALL	Notes	All Notes must be in ACM Format	All Notes are in ACM Format
ALL	ALL	In every first page of the chapter the page number must not visible	Page number at the start of the chapter was removed
1	17-18	Objectives of the Project - Add this in the last sentence of the introduction "this project shall achieve the following:" - SO2 will be To develop a web-based and mobile-based platform - Add Data Accuracy Testing in SO3	- Added "this project shall achieve the following:" in the last sentence of the introduction - Refined the SO2 into a single sentence. - Added Data Accuracy Testing in SO3
	19	Scope and Limitations of the Project Include the modules in the discussion	Included every Modules in the discussion
	22	Project Dictionary Removed the PharMediSync	Removed "PharMediSync" in the Project Dictionary
2		Sum up the relevances of the RRL	Summed up the relevance of the RRLs in section 2.1.1
	41	2.1.2 Design and Development Technology Anchored to the new objectives	Change it to "Web Based and Mobile System Development Technologies" anchored to the 2nd objectives
	55	User Acceptance Testing (UAT) Add more discussion	- Elaborated on the qualitative significance of UAT - Contextualized the UAT findings with long-term implementation success - Expanded the discussion on administrative utility and decision-support validation
	56	Performance Testing Add more discussion	Interpreted technical metrics to establish benchmarks for system robustness, scalability, and stability under peak load conditions
3	80-81	Convenience and Purposive Sampling Specify how many are needed	- Substituted Convenience Sampling with Census Sampling and Slovin's Formula - Integrated mathematical justification for population data
	84	Research Instrument Should be anchored to the objectives	Restructured the Research Instruments aligned to the objectives

	89-92	Table 2 - 4 • Add references	• Provided academic citations to justify the interpretation ranges.
	103-109	Figure 2 • Revise the Architecture Diagram • Add architectural views of the system 4 + 1 model	• Revised the Architecture Diagram • Added the 4+1 Model and Sequence Diagram

SOFTWARE PROGRAM		
MODULE NAME	RECOMMENDATIONS, SUGGESTIONS, AND COMMENTS (RSC)	ACTION TAKEN
	• Separate the form of logs and stocks	• The stock management and adjustments logs split into two separate sidebar modules and pages
	• It must integrate the process of return in the system	• Full Sales return are added—submit, approve, reject and auto-restore inventory
	• Fix the side tab	• Sidebar change to always visible with toggle button
	• Make responsive the system	• Will implement in the development phases
	• Add back button	• Back button added to every form, detail and sub-module page across all portals
	• Apply pagination in every table	• Pagination with page size, record count, and page controls added to every table
	• 1 form 1 process only	• All forms are restructured to handle exactly one process per form with step indicators
	• All the features of the system make sure that it is in the right module	• Full module audit done—GRR in procurement, returns own module, BIR own section, DSS own analytics modules
